EXPERIENCE

River Project, St Petersburg, Florida (Remote)— *Software Engineer*

August 2022 - PRESENT

Development of a bot using the Discord API, maintenance on the web page, and systems migrations.

Morena, Navojoa, Sonora— *Assistant*

February 2021 - July 2021

Management of the database of all the poll workers in the 7th district of the state of Sonora.

EDUCATION

Instituto Tecnológico de Sonora, Obregón, Sonora, México— *Software Engineering*

July 2021 - January 2025

With a Focus on Software Design and architecture to build large-scale systems.

PROJECTS

River Project

— *Discord Bot*

To integrate users, gather needed information and create study groups, I developed a discord bot and its connection with a cloud-based database, where users are able to interact.

— *Web App Language Migration*

I fixed the migration from JavaScript to TypeScript on a web application made with Vue.js, ensuring all the TypeScript support.

My Work
